

Training course structure

Monday, 21 September 2026

17:58

Main page and Course selections With company logo

**Computer
Fundamentals
and Networking**

**Process
Instrumentation
Fundamentals**

PLC (Siemens)
- S5
- S7

**Engineering
Station (ES680)**

GUI
- OM (T2000)
- HMI(T3000)

Course module selection

(when we click on each module it should show this menu)

Computer Fundamentals and Networking

Module 1:
Computer
Systems

Module 2:
Hardware

Module 3:
Operating systems

Module 4:
File Systems

Module 5:
Database

Module 6:
Networking

Module 7:
Server &
Application

Module 8:
Logs &
Troubleshoot

Module 9:
Security

Process Instrumentation Fundamentals

Module 1:
Introduction to Process
Instrumentation

Module 2:
Instrument Signals &
Communication

Module 3:
Pressure Instrumentation

Module 4:
Flow Instrumentation

Module 5:
Temperature
Instrumentation

Module 6:
Level & Position
Measurement

Module 7:
Analytical
Instrumentation

Module 8:
Digital/Binary &
Intelligent Instruments

Module 9:
Final Control
Elements & Actuators

PLC Fundamentals

Module 1:

PLC as a Specialized
Computer

Module 2:

The Automation
Highway/Plant bus

Module 3:

PLC Hardware & I/O
Architecture

Module 4:

PLC Scan Cycle & Real-
Time Control

Module 5:

Siemens Program
Organization & Blocks

Module 6:

Open-Loop &
Closed-Loop Control

Module 7:

PLC Control Logic
(Automating and
processing)

Module 8:

PLC-DCS Communication
& Integration

Module 9:

From PLCs to
the Power Station

Engineering Station (ES680)

Module 1:

Introduction to ES680

Module 2:

ES680 & INGRES
Database

Module 3:

Hardware Configuration
and Plant Topology

Module 4:

FUP and Control Logic

Module 5:

Signal Engineering
and I/O

Module 6:

Parameters s5
configuration and code
generation

Module 7:

Functional Groups
and control
Philosophy

Module 8:

Documentation and MMI
Engineering

Module 9:

Engineering workflow,
Commissioning and
Maintenance

Operating and Monitoring (T2000)

Module 1:

Introduction to
Operating and
monitoring

Module 2:

OM Project Layout
and Plant Hierarchy

Module 3:

Process Displays - Static
and Dynamic Graphics

Module 4:

Signal Mapping -
Connecting plant data to
the GUI

Module 5:

Faceplates and
device operation

Module 6:

Operator Commands,
Modes, Permissions and
Interlocks

Module 7:

Alarms, Trends and
Process Information

Module 8:

Configuring Modes & GUI
Engineering

Module 9:

Complete Plant
Operation - Field to
operator and back

Human Machine Interface(HMI) T3000

Module 1:

Introduction to T3000
and workbench

Module 2:

Project Structure and
plant

Module 3:

Plant displays & graphic
Configuration

Module 4:

Signal Mapping and
Process objects

Module 5:

Pictograms and
Faceplates

Module 6:

Operator Control Modes
and Authorization

Module 7:

Alarms, Trends,
Diagnostics & Process
Information

Module 8:

T3000 configuration and
Engineering modes

Module 9:

Complete T3000 plant
operation and Data
flow

Training section with quiz at the End(Each module will follow this structure)
